SKILLS & TECHNOLOGIES

Languages

Java, Python, TypeScript, C/C++

Frontend

React, Vite, i18n/RTL (multi-language)

Backend

Spring Boot, REST APIs, JWT Auth

Data

PostgreSQL, versioned schema migrations

DevOps & Tooling

Docker, Git, CI-driven automated testing

EDUCATION

M.Sc. Computer Science (Researcher)

Ben-Gurion University of the Negev · 2026
– Present

Current GPA 95 · Computer-vision research
with the Faculty of Engineering.

B.Sc. Computer Science

Ben-Gurion University of the Negev · 2022
– 2025

Final GPA 84.2 · Active swimmer, BGU ASA
competitive swim team.

Coursework: Operating Systems, Computer
Architecture, Systems Programming,
Databases

ACTIVITIES

Teaching Assistant — BGU · 2026 – Present

Supervises practicum coursework and
grades/examines student papers.

Individual/Group Swimming Instructor — Wingate Institute · 2014 – Present

Teaches fundamentals and advanced
technique to swimmers of all ages.

Volunteer Math & CS Tutor — BGU · 2026 – Present

Tutors first-year students in math and CS,
focused on reservist students returning to
their studies.

LANGUAGES

Hebrew — Native
English — Fluent

PROFILE

Full-stack software engineer with a Computer Science B.Sc. from Ben-Gurion University of the Negev, currently completing an M.Sc. in the same department. Builds production-quality client-server systems end to end — from data modeling and secure APIs to interactive frontends — equally comfortable behind the API and in front of a room. Currently building SwimEdge, a full-stack analytics platform for competitive swimming, drawing on years as a competitive swimmer and coach.

FEATURED PROJECT

SwimEdge — Full-Stack Competitive Swimming Platform

Founder & Sole Engineer · 2025 – Present · [GitHub](#)

- Designed and built a full-stack platform for real-time swimmer analytics and performance tracking, motivated by a gap identified firsthand as a competitive swimmer — owning architecture, backend, frontend, and infrastructure end to end.
- Engineered a modular, service-oriented Spring Boot + PostgreSQL backend (JWT auth, RESTful APIs) and an interactive React/Vite frontend; evolved the schema through 17+ versioned migrations, profiling and optimizing critical paths for runtime speed and memory footprint.
- Built a custom parser converting official Israeli Swimming Association PDF/Excel results into clean relational data, and shipped a multi-language, RTL-ready interface with role-based workflows for clubs, coaches, swimmers, and officials.
- Opened direct discussions with the Israel Swimming Association and engaged Israel's national sports administration (Ministry of Culture and Sport) on the opportunity for technological modernization across sport federations.

MILITARY SERVICE

Combat Commander, Paratrooper Brigade, IDF

2016 – 2019

- Trained and mentored newly recruited soldiers; led operations and managed company-level logistics.

Reservist, Paratrooper Brigade, IDF

2019 – Present

- Lead frontline teams under pressure, maintaining calm and accountability.
