[GitHub](#)
[Portfolio](#)

SKILLS & TECHNOLOGIES

Languages

Python, SQL, Java, TypeScript

Data & Analytics

PostgreSQL, data pipelines, BI-style dashboards

Research Tooling

NumPy, structured data wrangling

Backend

Spring Boot, REST APIs

Tools & Testing

Docker, Git, automated testing

EDUCATION

M.Sc. Computer Science

Ben-Gurion University of the Negev
Researcher, Prof. Gera Weiss's Lab · 2026 – Present (Expected Oct 2027)
Current GPA 95.

B.Sc. Computer Science

Ben-Gurion University of the Negev · 2022 – 2025
Final GPA 84.2 · Active swimmer, BGU ASA competitive swim team.
Coursework: Databases, Probability & Statistics, Computational Models, Numerical Analysis

ACTIVITIES

Teaching Assistant — BGU · 2026 – Present

Supervises practicum coursework and grades/examines student papers.

Individual/Group Swimming Instructor — Wingate Institute · 2014 – Present

Teaches fundamentals and advanced technique to swimmers of all ages.

Volunteer Math & CS Tutor — BGU · 2026 – Present

Tutors first-year students in math and CS, focused on reservist students returning to their studies.

LANGUAGES

Hebrew — Native
English — Fluent

PROFILE

Computer Science M.Sc. student seeking a data engineering student position. Builds traceable ingestion pipelines that turn federation PDFs and spreadsheets into relational records with entity resolution, source lineage, and explicit review of ambiguous matches. SwimEdge imported 47,509 results across 17 meets; the public swimdata-il project provides a reproducible proof of the matching method.

RESEARCH

Swimmer Biomechanics Research — Prof. Gera Weiss's Lab

Ben-Gurion University of the Negev · in collaboration with Prof. Raziel Reimer, Faculty of Engineering · 2026 – Present

- Conducting cross-disciplinary research applying computer vision and control theory to competitive-swimming biomechanics, bridging the Computer Science and Engineering faculties.
- Built Python pipelines that reconstruct swimmer joint motion from 3-D underwater pose-estimation data, using forward/inverse kinematics and nonlinear least-squares optimization to drive a third-party hydrodynamic simulation engine.
- Diagnosed systematic model-fitting errors (degenerate optimization bounds, skeletal geometry mismatches) via quantitative probing against ground-truth motion-capture data, backed by automated regression testing.

FEATURED PROJECT

SwimEdge — Full-Stack Competitive Swimming Platform

Founder & Sole Engineer · 2025 – Present · [GitHub](#)

- Built a custom data pipeline converting official Israeli Swimming Association PDF/Excel results into clean, queryable relational data, handling multi-column layouts that break naive text extraction.
- Designed performance-analytics dashboards surfacing personal bests, trends, and comparisons as decision-ready insight for coaches and clubs.

SwimData-IL (BGU Data Management Course Project)

Independent of SwimEdge · 2026

- Extracted and structured Israeli Swimming Association competition results from PDF documents into a clean, queryable dataset, independent of the main SwimEdge pipeline.

MILITARY SERVICE

Combat Commander, Paratrooper Brigade, IDF

2016 – 2019

- Trained and mentored newly recruited soldiers; led operations and managed company-level logistics.

Reservist, Paratrooper Brigade, IDF

2019 – Present

- Lead frontline teams under pressure, maintaining calm and accountability.
