SKILLS & TECHNOLOGIES

Product

Roadmapping, stakeholder engagement, user discovery

Languages

Java, Python, TypeScript

Full-Stack Foundations

Spring Boot, React, PostgreSQL

Tools & Testing

Docker, Git, automated testing

EDUCATION

M.Sc. Computer Science

Ben-Gurion University of the Negev
Researcher, Prof. Gera Weiss's Lab · 2026 – Present (Expected Oct 2027)
Current GPA 95.

B.Sc. Computer Science

Ben-Gurion University of the Negev · 2022 – 2025
Final GPA 84.2 · Active swimmer, BGU ASA competitive swim team.

ACTIVITIES

Teaching Assistant — BGU · 2026 – Present

Supervises practicum coursework and grades/examines student papers.

Individual/Group Swimming Instructor — Wingate Institute · 2014 – Present

Teaches fundamentals and advanced technique to swimmers of all ages.

Volunteer Math & CS Tutor — BGU · 2026 – Present

Tutors first-year students in math and CS, focused on reservist students returning to their studies.

LANGUAGES

Hebrew — Native
English — Fluent

PROFILE

Computer Science M.Sc. student seeking a product management student position. Founded SwimEdge after studying the limitations of existing federation tools, then mapped competition rules and user workflows into a staged product plan. Owns discovery, prioritization, implementation, and stakeholder validation, including a July 2026 demo to Israel Swimming Association leadership.

RESEARCH

Swimmer Biomechanics Research — Prof. Gera Weiss's Lab

Ben-Gurion University of the Negev · in collaboration with Prof. Raziell Reimer, Faculty of Engineering · 2026 – Present

- Conducting cross-disciplinary research applying computer vision and control theory to competitive-swimming biomechanics, bridging the Computer Science and Engineering faculties.
- Built Python pipelines that reconstruct swimmer joint motion from 3-D underwater pose-estimation data, using forward/inverse kinematics and nonlinear least-squares optimization to drive a third-party hydrodynamic simulation engine.
- Diagnosed systematic model-fitting errors (degenerate optimization bounds, skeletal geometry mismatches) via quantitative probing against ground-truth motion-capture data, backed by automated regression testing.

FEATURED PROJECT

SwimEdge — Full-Stack Competitive Swimming Platform

Founder & Product Owner · 2025 – Present · [GitHub](#)

- Identified a real gap as a competitive swimmer and independently scoped, built, and demonstrated SwimEdge — a full-stack analytics platform for swimmer performance tracking — owning the roadmap end to end.
- Translated domain expertise as a competitive swimmer and coach into product decisions, prioritizing against a tiered club-rollout strategy for clubs, coaches, swimmers, and officials.
- Pitched SwimEdge directly to the Israel Swimming Association and Israel's national sports administration, validating demand and shaping a rollout strategy toward national adoption.

MILITARY SERVICE

Combat Commander, Paratrooper Brigade, IDF

2016 – 2019

- Trained and mentored newly recruited soldiers; led operations and managed company-level logistics.

Reservist, Paratrooper Brigade, IDF

2019 – Present

- Lead frontline teams under pressure, maintaining calm and accountability.
